GRAVITYFLEX CONVEYORS

As well as traditional gravity roller conveyors, we also offer our range of versatile **Gravityflex Conveyors**.

The **Gravityflex roller skatewheel conveyor** is a more adaptable and flexible conveyor, which can be **extended** or **retracted** to suit the required length and can also be manipulated to form curves and bends.

Both **rollers** and **skatewheels**, when extended, are at **125mm pitch**. On the skatewheel version, the skatewheels are pitched at **100mm** across the width, and are staggered to create a smoother run.

All projects are **individual**, therefore you supply us with information such as: a **description** of the product (**weights and dimensions**) and production **environment**, and we will tailor the most suitable set of components to create the most effective scheme.
